Subject: Microsoft settlement

Microsoft has been harassed enough. The whole case against them is an assault on brilliance, productivity, savvy marketing, quick acting, independence and the success that comes from it. Those who seek to gain by this case are sluggish, unproductive parasites who wish for windfalls at the hand of government coercion.

Settle with the smallest restriction on Microsoft as possible. I want the best they can offer me at the lowest possible cost.

I am not speaking on behalf of my employer,

JP
